Professional Summary

Cybersecurity professional and U.S. Navy veteran with experience supporting secure operational environments and technical systems. CompTIA Security+ certified with hands-on experience in network scanning, packet analysis, and vulnerability assessment using tools such as Nmap, Wireshark, and Metasploit. Currently completing a Bachelor of Science in Information & Cybersecurity Operations at ECPI University (Expected May 2026). Active Secret Clearance and strong foundation in system monitoring, documentation, and security operations.

WORK EXPERIENCE

Children's Hospital of The King's Daughters, Norfolk, VA

Security Officer II

04/2025 – Present

- Maintain security operations within a 24/7 healthcare environment ensuring compliance with access control and safety policies.
- Monitor facility systems and respond to security incidents involving personnel, safety, and access control events.
- Document and report security incidents to support investigations and operational reviews.
- Coordinate with security teams and law enforcement during incident response situations.
- Maintain situational awareness across complex operational environments.

United States Navy, Norfolk, VA

Database & Systems Administration (NALCOMIS)

11/2015 – 01/2024

- Managed aviation maintenance databases and operational records supporting mission-critical aircraft readiness.
- Maintained and audited technical documentation within NALCOMIS systems ensuring data integrity and compliance.
- Administered access controls and safeguarded sensitive operational information.
- Supported system documentation and reporting in secure Department of Defense environments.
- Identified discrepancies in documentation systems and implemented corrective actions.
- Maintained Active DoD Secret Security Clearance.

Technical Projects

- Network scanning and enumeration using Nmap.
- Packet analysis using Wireshark.
- Penetration testing labs using Metasploit.
- Python scripts including password checker and port scanner.

SKILLS

Technical Skills:

Security Tools

1. Nmap
2. Wireshark
3. Metasploit
4. TCPDump

Operating Systems

1. Linux
2. Windows

Programming / Scripting

1. Python
2. Bash

Cybersecurity Areas

1. Network Security
2. Vulnerability Assessment
3. Security Monitoring
4. Incident Response

EDUCATION

ECPI University

Bachelor of Science -

Information & Cybersecurity Operations

Virginia Beach, Virginia

10/2023 - 05/2026

Certifications

CompTIA Security+ (SY0-701) - May 2025

Administrative Services Manager -

September 2023

Professional Strengths

- Security Operations Awareness
- Technical Documentation
- Analytical Problem Solving
- Team Collaboration
- Mission-Focused Execution

Other

- U.S. Navy Veteran
- Active Secret Clearance
